Perdue Sustainability Program

Welcome to the Perdue Sustainability Program

Your agronomic data is essential in helping us understand the impact Perdue products have on our planet. Now that you've submitted fields into the program, we want to help you understand how it works.

Below are program milestones and what to expect next.

SIGN AGREEMENT

First Step

A Bayer representative will call to confirm your enrollment, discuss program details, and send you the Bayer Carbon-Smart Practices Master Agreement. Your enrollment isn't finalized until you speak with a Bayer representative and sign the agreement.

FINALIZE DELIVERY (for 2023)

February 16, 2024

The final number of acres eligible for your enrollment in the Perdue Sustainability Program will be determined after the total grain is delivered to an approved Perdue facility by February 16, 2024. The total bushels delivered will be divided by the actual yield associated with the enrolled fields to calculate the maximum acres eligible to remain enrolled, rounded down to the nearest acre.

FIELD INFORMATION

March 31, 2024

Submit your field information that is associated with the 2023 crop season, by March 31, 2024. A Bayer representative will help guide you through the process.

SOIL SAMPLE

April 2024

Soil sampling will begin after your fields are enrolled in the program and will continue through April 2024. There is no cost to you for the sampling.

RECEIVE PAYMENT

Summer 2024

Your payment is sent after data verification is complete in Summer 2024. Payment is based upon your total eligible acres enrolled in the Perdue Sustainability Program at time of payment for which program requirements were met.*
